Who am I?

I am an experienced Full Stack Developer with a background in economics. With a broad knowledge of three different development languages and ability to work in a faced paced environment, I adapt easily when faced with new challenges.

Technical Skills

- *Languages:* Python, Swift 2 & 3, Javascript, Java, HTML, CSS
- *Frameworks:* Django, Flask, Express.js, Angular.js, MVC
- *Databases:* MongoDB, mySQL, noSQL, Core Data
- *Other:* Git/GitHub, Bower, Node.js, jQuery, Ajax, Amazon Web Services, Twitter Bootstrap

---

Experience

Coding Dojo

- Finished a rigorous three-month coding bootcamp in which I learned crucial technical skills to become a full stack developer in three languages --Swift, Python, and Javascript -- while working sixty to seventy hours per week.
- At the end of each language, I passed the final exam testing for cumulative knowledge and for a proficient grasp for each full stack. At the end of each, deployment was required with Amazon Web Services.

Projects

- **Potluck (**Python, jQuery, Django) - Recipe/cooking social media website
  - Responsible for creating Schemas and relationships, front-end and MVC development, and creating the rating functionality.
  - Deployed with Amazon Web Services
- **Unscramble** (Swift 2, Core Data) - Mobile application where users unscrambled words in a time limit
  - Responsible for the creation of the entire app since my partner and I peer programmed the entire project.
- **Dinr** (Swift 3, Core Data) - Mobile application where random businessmen/women arrange food meetings
  - Responsible for collaborating on MapKit and creating delegates for modal and show transitions.
- **Freelance Work**
  - Currently working in a collaborative effort to revamp a property management website including their admin pages.
  - All three sites are connected in a MVC framework and utilize the MEAN stack, HTML, CSS, and Twitter Bootstrap.

Education

Coding Dojo (August 2016 - October 2016)

- Certificate for Web and Software Development with Python, Javascript, and Swift

University of Washington (September 2012 - June 2016)

- Bachelors in Political Economics
- Brother of the business fraternity Delta Sigma Pi and President of the Epsilon pledge class
- Ensured professional, fundraising, and community service events were held by my pledge class
