Who am I?

I am an experienced Full Stack Developer with a background in economics. With a broad knowledge of three different development languages and ability to work in a fast-paced environment, I adapt easily when faced with new challenges.

Experience

HyphenAI - Software Developer   **May 2017 - Present**
- ❖ Currently working as a contractor to help engineer HyphenAI's software on a project by project basis.

Coding Dojo - Teaching Assistant   **Jan 2017-March 2017**
- ❖ Worked with new students by answering and guided them through their questions and errors.
- ❖ Assisted head instructors through teaching small lectures and live coding demos.
- ❖ Helped revise and develop curriculum as well as prepare lessons for students.
- ❖ Reinforced concepts and lessons presented by instructors by reviewing materials with students.

Freelance Work   **Dec 2016 - Jan 2017**
- ❖ Worked in a collaborative effort to revamp Sunny Hills Palladium's website including their admin pages. All three sites are connected in a MVC framework and utilize the MEAN stack, HTML, CSS, and Twitter Bootstrap.

Projects

Missing Semicolon   **April 2017**
- ❖ A developer blog built with Python, Bootstrap, and Django to serve as an outlet for my problem solving ability, conundrums, and general thoughts on programming.
- ❖ Responsible for the entirety of the project and post 5 times per week to discuss algorithms, data structures, and coding.

Potluck   **September 2016**
- ❖ Recipe/cooking social media website created with Python, jQuery, Django
- ❖ Responsible for creating Schemas, relationships, front-end, MVC development, rating, search functionality, and lastly login and registration functionality of users.

Discussion Dashboard   **October 2016**
- ❖ Reddit style web application where users can post questions and other uses can comment on discussion threads.
- ❖ Responsible for creating the whole project from scratch using MongoDB, Express.js, Angular.js, Node.js, HTML, and CSS.

Education

Coding Dojo   **July 2016 - Oct 2016**
- ❖ Finished a rigorous three-month coding bootcamp in which I learned crucial technical skills to become a full stack developer in three languages --Swift, Python, and Javascript -- while working sixty to seventy hours per week.
- ❖ At the end of each stack, I earned what Coding Dojo calls a "Black Belt". This means I placed at the top of my cohort by passing the final exam testing for cumulative knowledge and for a proficient grasp for each full stack. At the end of python and javascript, deployment was required with Amazon Web Services. My scores for the exams were 9.95/10 for MEAN, a 10/10 for Swift, and a 9.95/10 for Python.

University of Washington   **Sept 2012 - June 2016**
- ❖ Bachelors in Political Economics.
- ❖ Brother of the business fraternity Delta Sigma Pi and President of the Epsilon pledge class.
- ❖ Ensured professional, fundraising, and community service events were held by my pledge class.

Technical Skills

- ❖ *Languages:* Python, Swift 2 & 3, Javascript, Java, HTML, CSS
- ❖ *Frameworks:* Django, Flask, Express.js, Angular.js, MVC
- ❖ *Databases:* MongoDB, mySQL, noSQL, Core Data
- ❖ *Other:* Git/GitHub, Bower, Node.js, jQuery, Ajax, Amazon Web Services, Bootstrap, Socket.io
